

# 10x your data's value with Search AI

## Tap into your underutilized data with Elastic's Search AI Platform

The Search AI Platform is the foundation for Elastic's two out-of-the-box solutions, Elastic Observability and Elastic Security. It's the platform of choice for developers building the next generation of generative AI (GenAI)-powered applications and services. As the fusion of search technology and artificial intelligence, Search AI is uniquely capable of transforming 50% of the Fortune 500 underutilized, unstructured data into the right answers, impactful actions, and meaningful outcomes.

**\$1.2M**

saved per employee per year<sup>2</sup>

# The Search AI Platform is:

## Open by design

Built on open standards, ensuring interoperability, adaptability, and scalability

## Built for performance

Delivers real-time search and analysis to enable accurate and reliable decision-making at scale

## Wired for innovation

Enables data correlation across any type, source, or use case — eliminating data silos — so insights and actions happen where data lives

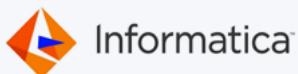

## Trusted by:

Booking.com

EQUINOX

Uber

US Army Corps  
of Engineers.
