elastic

Search, Observe, and Protect with Elastic in the cloud

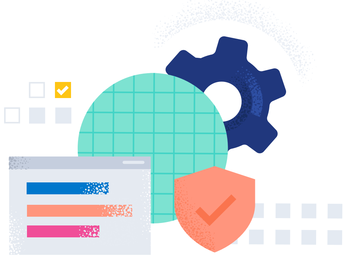
Accelerate results across any cloud with Elastic solutions covering Search, Observability, and Security – all in one platform.

Search

Improve customer satisfaction and employee productivity by helping everyone find what they need, when they need it through the power of search. Reduce costs and management overhead so you can focus on providing great search experiences.

Observability

Use end-to-end visibility across all your applications and infrastructure to quickly track down and solve problems before they impact your business. Simplify management, reduce MTTD/MTTR, and always have access to the historical data you need to perform root-cause analysis.



Security

Secure the entire attack surface by using end-to-end visibility to prevent, detect, and quickly respond to threats. Protect your organization while reducing your total cost of ownership, all within the cloud.

Elastic helps the world's leading organizations accelerate results that matter by putting data to work through the power of search.
