

Search. Observe. Protect.

Elastic solutions

Elastic is a search company that powers enterprise search, observability, and security solutions built on our free and open technology stack — Elasticsearch, Kibana, Beats, and Logstash — that can be deployed anywhere. From finding documents to monitoring infrastructure to hunting for threats, Elastic makes data usable in real time and at scale.

Elastic Enterprise Search

Powerful, modern search experiences for your workplace, website, and apps.

Elastic Observability

Unified analysis across logs, metrics, APM, and uptime monitoring.

Elastic Security

Threat prevention, detection, and response with SIEM and endpoint security.
